Durasein
SOLID SURFACE

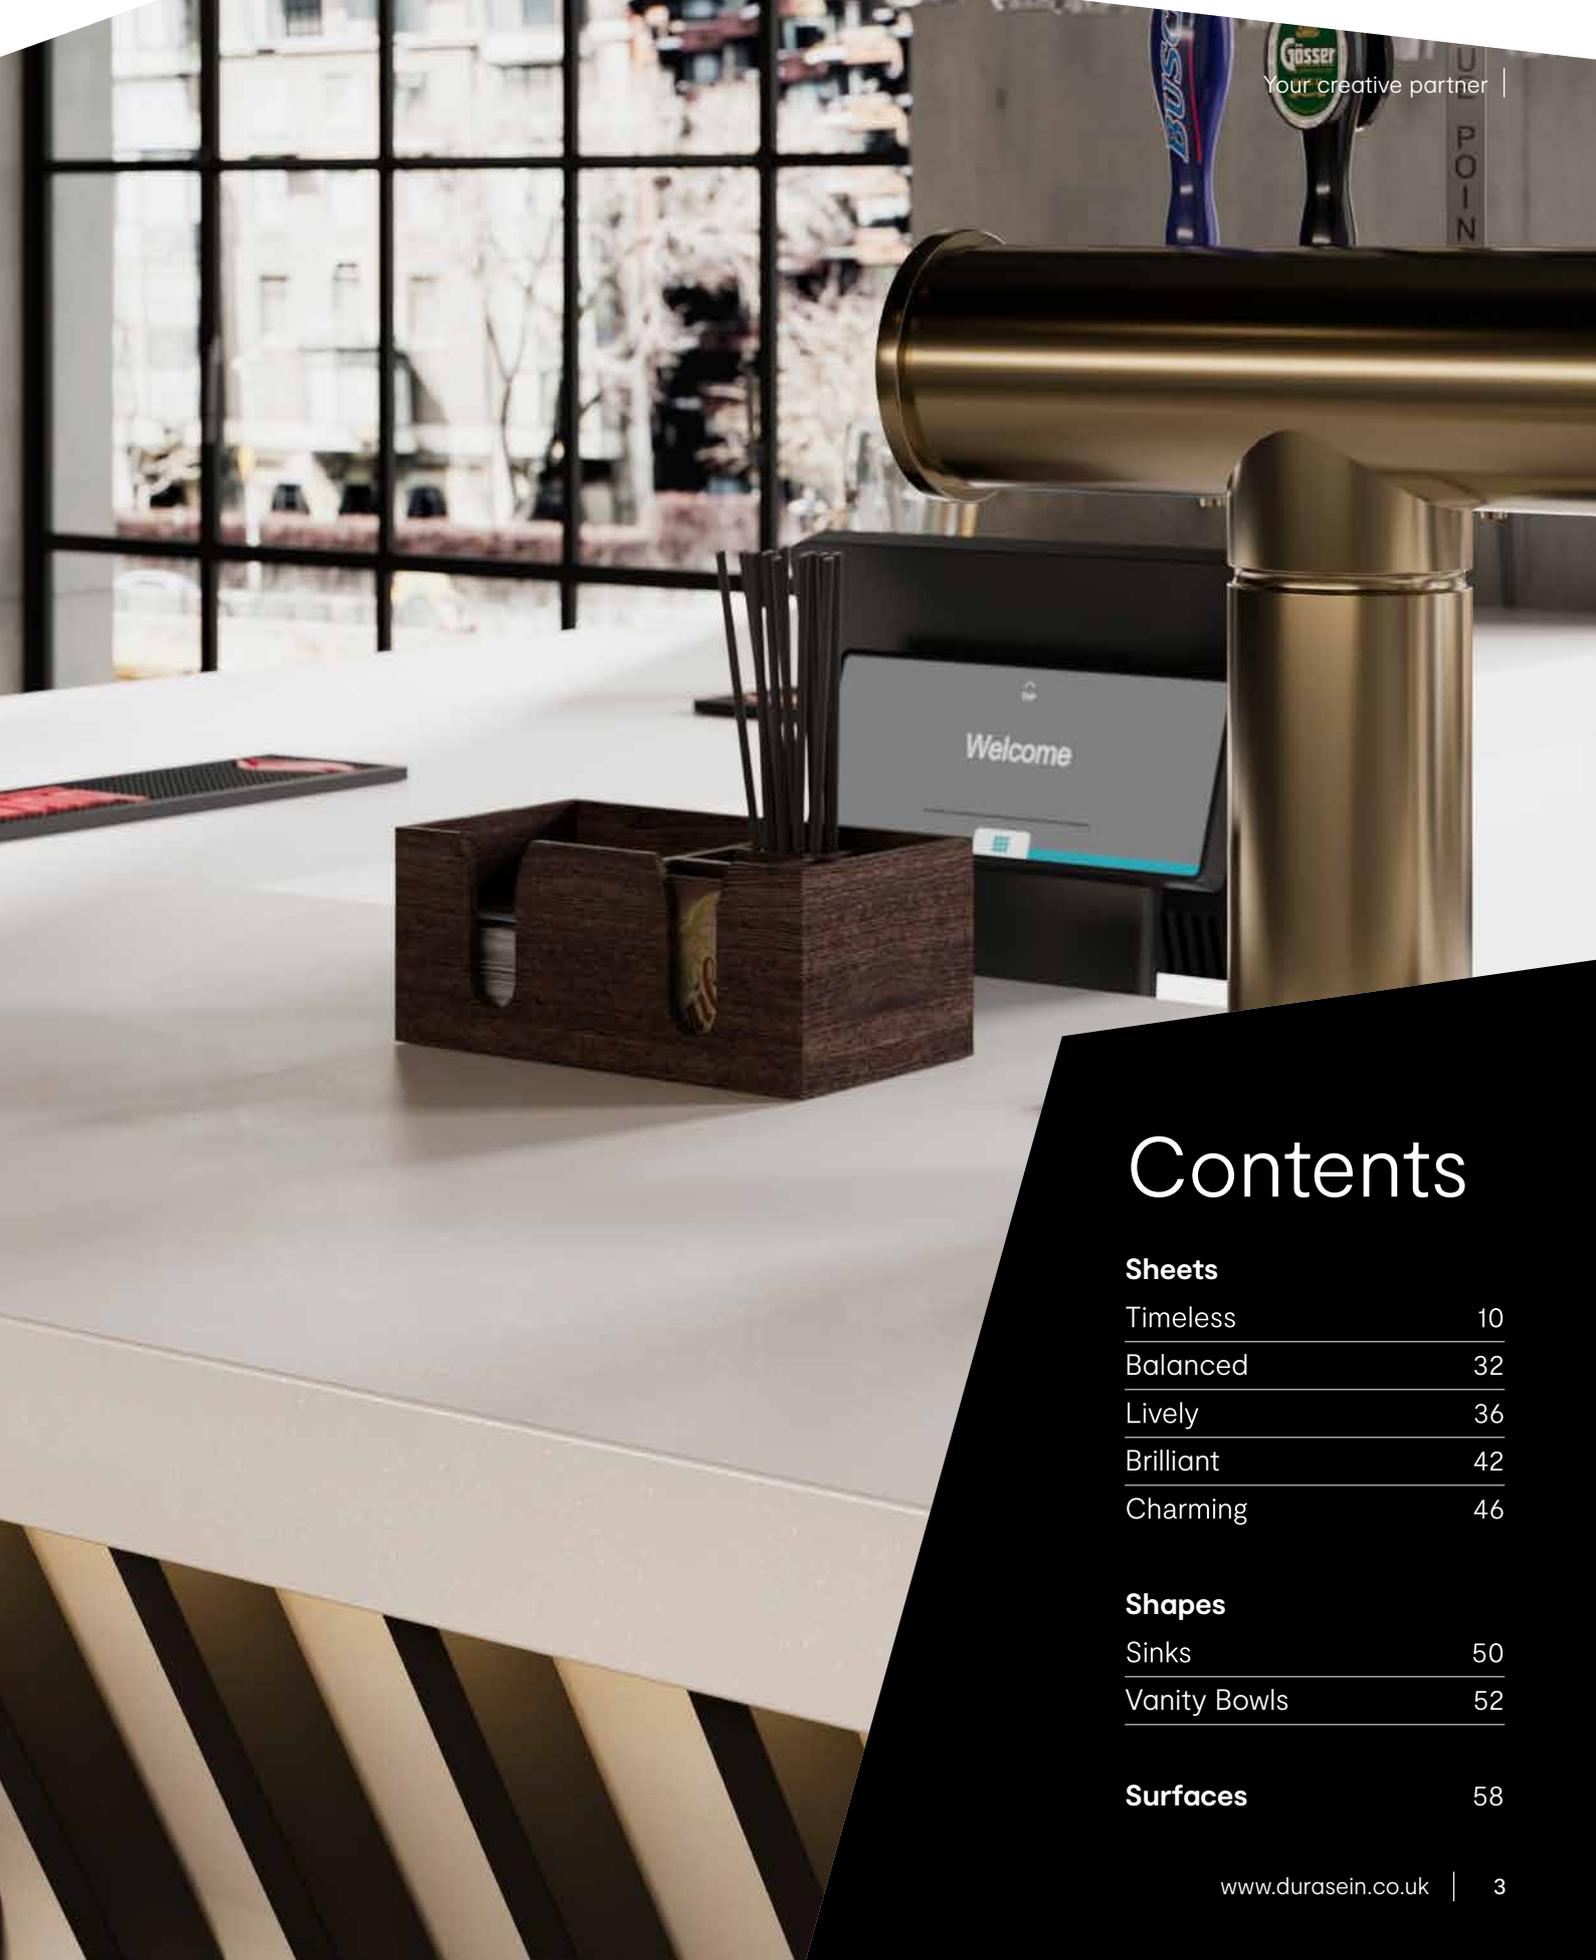

Think of us as your creative partner

We're Durasein, your solid surface partner. We're here to give your ideas the support they deserve – without the fuss. Whether it's as simple as a sink, or your wildest design idea, with Durasein you can bring it to life.

We have a palette of 60 solid surface sheet decors and a brilliant line of stunning sinks to help you do the best work of your life.

The future is in your hands.
Show us what it looks like.

Our super solid surface

Durasein pure acrylic solid surface is approximately two-thirds aluminium trihydrate and a third acrylic resin and natural pigments. The aluminium hydroxide gives the product a particular strength, and the quality of the acrylic resin ensures cleanliness, suitability for contact with food, water resistance, and colour stability over time.

Despite its consistency being similar to natural stone, Durasein is repairable and can be fabricated with woodworking equipment. It can be seamlessly joined and a simple thermoforming process allows the creation of curved surfaces, providing unrivalled design capabilities.

Durasein complies with Euroclass B-s1-d0 standards.

State of the art manufacturing facilities

Our factory consists of four state-of-the-art manufacturing lines; three of which are dedicated to the production of pure acrylic sheet material, with the fourth producing pure acrylic moulded shapes.

We're also proud to produce our own high quality collection of cast sinks and bowls on-site, ensuring exact colour consistency to our sheet material.

Durasein set up the first flexible manufacturing line in the world which ranges from 760mm to 1520mm in width.

PAW100 Blossoming

Features & Benefits

10 Year Warranty

Durasein comes with a 10 year warranty against manufacturing faults, providing peace of mind when specifying our product – whether it's sheet material or sinks and bowls.

Seamless Joints

Colour matched adhesive for all décors helps to give an unbroken and flowing finish to your designs.

Repairable

Minor scratches can be sanded and polished out to help maintain a pristine appearance. Larger chips, deep scratches or more severe damage can be filled, or section/s replaced.

Non-Porous & Waterproof

Durasein sheets are non-porous and 100% waterproof, allowing use in a vast range of applications.

Fire-Resistant

Tested to EN13501-b, comparable to UK BS476 Class 0.

Hygienic And Easy To Clean

With thermoformed curved upstands and splashbacks on worksurfaces and vanity tops, those hard to clean dirt traps are eliminated.

Thermoformable

When heated to the correct temperature, Durasein becomes malleable and can then be curved and formed to your bespoke design.

High Durability

Durasein sheets are extremely durable, with a high resistance to most everyday cleaning products and stains – as well as many more harsh chemicals and staining agents.

Food Hygiene

Durasein meets NSF51 standards, so is certified for use in food preparation areas (e.g. residential & commercial worksurfaces, food preparation areas, servery counters, etc).

Creativity is our speciality

Let's make
something amazing

We believe the best results come from creative collaboration and truly serving the needs of the creatives and fabricators that inspire us.

And with over 20 years of manufacturing experience, it's safe to say we've learned how to get a few things right by now.

We're proud to say that our products have been specified by some of the most prominent creative firms in the industry, and fashioned by topnotch fabricators across the globe.

We're committed to helping our creative partners do their best work no matter how twisty or bendy the idea.

The only limit is your imagination.

From inspiring places to bespoke home spaces

We're solid surface people driven by creativity. Sure, our products are gorgeous, versatile and incredibly durable, but what really makes us different is the way we work with you.

The following pages showcase all of our surfaces across a variety of sectors, from domestic kitchens and bathrooms to coffee shops and airports.

Explore our varying collections of acrylic solid surface materials – from 'Lively' to 'Charming', each collection contains carefully curated styles, shades and colours that meet your needs, whatever they may be.

POINT

MENSWE

PM4907 Triarctic

Our recipe for this colour?
Put a little ice in the blender
and hit pulse.

PM4533 Triostone

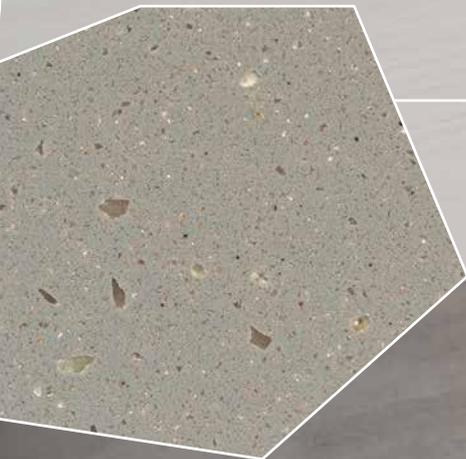

This is what true grit looks like
(as seen in grey, black and white).

PM4479 Concrete

Pour this utilitarian yet confident colour across your urban (or suburban) landscape for a gritty edge, without actual grit to clean.

PM4836 Clay
An earthy grey
spotted with
rocks and relics.

TS082 Gamma

A little treat for everyone
who thinks gamma style >
granny style.

PM201 Glacier White
Timeless & true, this granite-soaked ice can lower the temperature in any room.

D These are heavily pigmented colours, and are prone to show scratches, dust, haziness and ordinary wear & tear more easily than lighter colours. Therefore, they are not recommended for use in residential or commercial applications that will be subject to heavy use and/or horizontal application, and will not be covered under the 10 year warranty in relation to claims resulting from ordinary wear and tear.

DF Directional fabrication is required to ensure the most consistent aesthetics. Please ensure that when joining side-by-side or end-to-end, the sheet is fabricated directionally.

P These designs feature pearl material in the top surface only, which will therefore not show through the thickness of the sheet. Applications such as coved upstands and downstands highlight the exclusion of pearl material through the product; edges should always be mitred or heavily rebated on these decors.

V These are veined colours, and small samples may not accurately represent the veining effect. Applications such as coved upstands and non-rebated downstands highlight the vein through the product; edges should always be rebated on these decors.

The Durasein product samples received are a guide to colour and overall aesthetics only. Therefore please ensure you are familiar with the overall look of the product prior to purchase so as to avoid misperception issues with the final fabricated product.

All sheets will include a batch reference printed on the sheet edge. Please ensure that the batch numbers are checked upon receipt and recorded by you for future reference. Batch numbers must be identical to ensure colour consistency, however all sheets should still be inspected before fabrication commences to exclude colour differences between sheets. Any discrepancies found with the batch numbers when delivered must be reported back to your supplying IDS branch before fabrication commences.

No claims for colour variation can be accepted where different batch number sheets have been used.

All fabrication using Durasein solid surface material should be carried out as per the published Durasein Fabrication & Installation Manual in all respects. The associated Durasein product manufacturing defect warranty is only applicable to fabrications and

installations that have been correctly conducted as per the Durasein Fabrication & Installation Manual stated procedures, which can also be found on www.durasein.co.uk.

Only recommended adhesive & alcohol must be used to ensure the validity of the 10 year commercial and domestic limited warranty. Please ensure that the correct colour matched adhesive is used with your sheets as incorrect adhesives will make the joint conspicuous and will invalidate your 10 year commercial and domestic limited warranty. Please ensure all joints are thoroughly cleaned using DE-NATURED alcohol before applying jointing adhesive as contaminated joints also void any warranty.

All décors require careful and tight jointing to ensure inconspicuous joints, using only the recommended jointing adhesive.

Durasein recommended adhesives have a 15 month shelf life from fill date and these should be checked before fabrication commences. All cartridges will achieve their shelf life if they are stored in a cool dry place in a vertical position and protected from sunlight.
